DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Christopher Ward on December 27, 2006.

The application has been amended as follows:

In The Claims

8. (Currently Amended) ~~A-UMTS mobile telephony system using the system of claim 1~~ The system of claim 5 wherein the system is a UMTS mobile telephony system.

15. (Currently Amended) A system for transmitting data over a physical resource, comprising:

a first layer configured to manage the physical resource and to guarantee a quality of service;

a first sub-layer configured to supply a transmission support in accordance with the quality of service and to segment the data into transmission units, the first sub-layer reducing a size of at least one of the transmission units when transmission conditions on the physical resource are degraded;

Art Unit: 2616

a second sub-layer configured to transmit at least one of the transmission units over the physical resource during each of transmission time intervals, the transmission time interval being a periodic time interval during which the second sub-layer is allowed to access the physical resource; and

a physical layer configured to perform error correction coding or decoding of the data, wherein the first layer guarantees the quality of service by assigning a set level to the ratio of received signal power to noise plus interference, and

in the case of degradation of the transmission conditions the transmission power of a transmitter is increased so as to maintain the quality of service, and

wherein the first layer allocates resources by reducing the set level of a low-priority service.

Allowable Subject Matter

2. Claims 1-5, 7-10, 12, 14-16, 18-21, 24, 26-28, and 30-32 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly suggest that the first layer guarantees the quality of service by assigning a set level to the ratio of received signal power to noise plus interference, in the case of degradation of the transmission conditions the transmission power of a transmitter is increased so as to maintain the quality of service, and the size of each of the transmission units is reduced when the transmission power reaches a maximum value, as specified in independent claims 5 and 12.

The prior art does not teach or fairly suggest that the first layer guarantees the quality of service by assigning a set level to the ratio of received signal power to noise plus interference, in

Art Unit: 2616

the case of degradation of the transmission conditions the transmission power of a transmitter is increased so as to maintain the quality of service, and wherein the first layer allocates resources by reducing the set level of a low-priority service, as specified in independent claim 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anh-Vu H. Ly whose telephone number is 571-272-3175. The examiner can normally be reached on Monday-Friday 7:00am - 4:00pm.
